

SYMBIOSIS IN AQUATIC SYSTEMS FUNDING OPPORTUNITIES

Two open funding opportunities are offered by Gordon and Betty Moore Foundation.

Symbiosis Model Systems

The Gordon and Betty Moore Foundation's [Symbiosis in Aquatic Systems Initiative](#) is soliciting pre-applications to advance development of experimentally tractable model systems in aquatic symbiosis. Additionally, we are seeking information about needs in model systems development through a [related survey](#). The deadline for submitting a pre-application for the Symbiosis Model Systems funding call is **August 8, 2019 at 23:59 PDT**. In addition to seeking researchers who currently work in these areas, we hope to identify scientists and engineers who have not previously worked on these topics and who would bring novel perspectives, methods and technologies to this important areas of science. Learn more about this funding opportunity, including FAQs and eligibility requirements: <https://symbiosis.smapply.io>.

Moore–Simons Project on the Origin of the Eukaryotic Cell

The Gordon and Betty Moore Foundation's [Symbiosis in Aquatic Systems Initiative](#) and the Simons Foundation division of [Life Sciences](#) are jointly soliciting proposals for research on the origin of the eukaryotic cell. The deadline for submitting a proposal is **September 30, 2019 at 23:59 PDT**. In addition to seeking researchers who currently work in these areas, we hope to identify scientists and engineers who have not previously worked on these topics and who would bring novel perspectives, methods and technologies to this important areas of science. Learn more about this funding opportunity, including FAQs and eligibility requirements: <https://symbiosis.smapply.io>.
